URGENT ALERT

Emergency Stabilization

Oct 24, 2023 • Dr. Aris Thorne

Patient presented with severe hypoglycemia (42 mg/dL). Administered IV glucagon. Monitoring stabilized after 45 minutes. Recommended adjustment to nocturnal insulin dosage.

Hypoglycemia | Emergency

OBSERVATION

Routine Wellness Check

Sep 12, 2023 • Community Health Team

Blood pressure slightly elevated (145/90). Patient reports mild fatigue. Diet compliance is high, but exercise frequency has decreased due to knee pain.

STABLE

Initial Assessment

Aug 05, 2023 • Nurse Sarah Jenkins

Baseline assessment completed. Patient is articulate and shows strong understanding of medication schedule. All vitals within expected range for age and condition.
